I wrote this ;>

Yep, wrote this myself. Promise lol.
Used my tablet pen for the whole thing.

Definitely didn't use Shantell Sans

by Shantell Martin and Arrow Type. Nope.
And Typst? I still call that Typscript lol.

So yeah, obviously this was all manual.

No AI agent using a skill specifically made
for this, like Iwroteit:P. That would be too convenient.

Getting lazy near the bottom now.
My hand is tired, okay?
Nothing to do with fatigue: 0.85. Hehehe.

Wait, you can change that with one setting?

Anyway, wrote it myself. You saw nothing ;>

Okay fine, actual credits (click them): Shantell Sans + Typst + Iwroteit:P.
This is a generated handwriting demo. The promises are a joke.
