I wrote this ;>

This text is written by me. Promise.
Hand made. Tablet pen. A very real wrist.

Definitely not Shantell Sans.

No help from Shantell Martin or Arrow Type.
And certainly not Typst. I call it Typscript.

That is how you know I am a human.

No AI agent. No suspiciously specific skill
called Iwroteit:P. Just me and my extremely honest pen.

My handwriting is getting lazier because
I am tired. Not because someone typed
fatigue: 0.85 into a function. Obviously.

Three wrist stretches. One imaginary coffee.
Anyway. All me. You saw nothing. ;>

Actual accomplices (click them): Shantell Sans + Typst + Iwroteit:P.
A synthetic handwriting demo. The promises above are doing comedy.
